

Inventor Design Automation

Course Details:

Duration: 2 Days

Prerequisite: Completion of Inventor Introduction

Courseware: Included

Achievement: Certificate

Time: 9:00 a.m. - 5:00 p.m.

General Information:

Locations: Courses are hosted at training facilities across Canada, including:

Burnaby, BC
Calgary, AB
Edmonton, AB
Regina, SK
Winnipeg, MB
Vaughan, ON
Etobicoke, ON
Ottawa, ON
Toronto, ON
Quebec City, QC
Montreal, QC
Hanwell, NB
Halifax, NS

Alternatively, training can be conducted on-site for a specific client or at a 3rd party facility in any city or province

Pricing, Registration &

Scheduling: Please contact our training coordinator at 1-877-438-2231 x227 or via email at training@solidcad.ca

Course Description:

This course teaches the use of Inventor's iLogic functionality for the creation of rules-based, or "smart" parts and assemblies. Through an intuitive user interface design rules can be embedded within Inventor files which help to control the behaviour of a geometry when generating multiple variations of a design. Best of all, iLogic is simple enough that any Inventor user can learn it without an extensive background in programming.

After completing this course, users will be able to automate everything from simple macros to complex assembly configurations using iLogic functionality.

Learning Objectives:

- Design automation and iLogic overview
- User parameter types and controls
- Creating rules using the iLogic interface editor
- Embedded and external rules
- Associating rules to "event triggers"
- Interacting with Microsoft Excel (read and write)
- Using the iLogic Wizards
- Creating custom forms
- Developing best practices

Supplemental Learning:

- Inventor Intermediate
- Inventor for CAD Administrators
- Inventor Sheet Metal Design
- Inventor Productivity
- Inventor Update
- Inventor Simulation & Analysis
- Inventor Presentations & Rendering
- Inventor Advanced Part Design
- Vault for Designers
- Inventor Tube & Pipe
