# BIM BATCH SUITE

**BIM Batch Suite** provides tools that allow Revit users to process workflows en masse, with a focus on importing and exporting data.

- Gain more control over many common tasks with intelligent upgrading, parametric filtering, selective family loading and exporting
- Easy to use, intuitive interfaces for every Revit project team member
- Powerful scheduling and configuration features for enterprises
- Reduces tedious, time consuming processes to just minutes

## FREE TOOLS

After 14 day trial expires, these tools will remain fully functional

### Family Exporter

- Easily select specific families to export from projects
- Automatically create folder structures based on family categories and geometry
- Add custom text to exported file names
- Control whether to overwrite or skip previously exported files in the target folders

### Family Loader

- Batch load families into multiple projects
- Loads families into families
- Selectively load families from multiple folders of files
- Choose whether to reload updated or all selected families

## PREMIUM TOOLS

These tools are available with purchase of the CIM Project Suite.

### Plotter and Exporter

- Create and schedule jobs for exporting to files or plotting to paper
- Exports to PDF, DWG, DXF, DGN, DWF, DWFx, Navisworks, IFC and FBX
- Schedule exports to occur automatically, unattended
- Incredibly intuitive interface and easy to learn
- Drag and drop from a project or use wildcards to dynamically search for views and sheets to export
- Views and sheets can be searched for by names, types revision status and parameter values
- Comes with a free PDF printer driver

### Projects & Families Upgrader

- Upgrade multiple projects and templates at once
- Upgrade multiple families at once
- Migrate workshared (central) files automatically or upgrade in place
- Automatically adjust linked Revit and CAD file paths to new locations
- Easily select files in an intuitive user interface
