Course Description:

The AutoCAD P&ID Introduction training program teaches the fundamental features and processes of AutoCAD P&ID for creating intelligent piping and instrumentation diagrams.

Upon completion, users will be comfortable with the tools required to create, modify, annotate and manage P&ID schematics. Users will also learn the processes related to managing data, reporting, sharing, and validating information associated with P&ID's.

Learning Objectives:

- User interface
- Project manager
- Equipment and nozzles
- Lines and inline components
- Instruments and instruments lines
- Tagging and annotation concepts
- Editing techniques
- Data manager
- Custom one-off symbols
- Off page connections
- Generating reports

Supplemental Learning:

- AutoCAD P&ID Admin
- AutoCAD Plant 3D User
- AutoCAD Plant 3D Admin
- Navisworks for Plant Design
