

# Navisworks for Factory Design

## Course Details:

**Duration:** 2 Days

**Prerequisite:** Basic knowledge of 2D or 3D CAD software. Knowledge of task scheduling software is helpful but not required

**Courseware:** Included

**Achievement:** Certificate

**Time:** 9:00 a.m. - 5:00 p.m.

## General Information:

**Locations:** Courses are hosted at training facilities across Canada, including:

Burnaby, BC  
Calgary, AB  
Edmonton, AB  
Regina, SK  
Winnipeg, MB  
Richmond Hill, ON  
Ottawa, ON  
Toronto, ON  
Quebec City, QC  
Montreal, QC  
Hanwell, NB  
Halifax, NS

Alternatively, training can be conducted on-site for a specific client or at a 3rd party facility in any city or province

## Pricing, Registration & Scheduling:

Please contact our training coordinator at 1-877-438-2231 x227 or via email at [training@solidcad.ca](mailto:training@solidcad.ca)

## Course Description:

This program is specifically tailored for users wanting to use Navisworks to validate the factory design layouts. It focuses on the powerful viewing, coordination and presentation tools within Navisworks. Users learn to combine 3D geometry from cross disciplines into one scene, enabling cost-effective model reviews.

After completing this course, users will be able to visualize and review large complex layouts by means of real time fly-through, walk-through and by using the analysis tools within Navisworks.

## Learning Objectives:

- User Interface and navigation tools
- Workflow
- Data aggregation
- Publishing NWD files
- Creating Viewpoints and Animations
- Factory layout tools
- Measuring and using Redline tools
- Sectioning tools
- Evaluating construction processes with 5D Analysis
- Adding Point Cloud Data
- Clash detection
