

Course Details:

Duration: 2 Days

Prerequisite: None

Courseware: Included

Achievement: Certificate

Time: 9:00 a.m. - 5:00 p.m.

General Information:

Locations: All courses are offered online, on-site, or in-person at SolidCAD training facilities across Canada, including:

Burnaby, BC
Calgary, AB
Edmonton, AB
Regina, SK
Winnipeg, MB
Richmond Hill, ON
Ottawa, ON
Toronto, ON
Quebec City, QC
Montreal, QC
Hanwell, NB
Halifax, NS

Alternatively, training can be conducted on-site for a specific client or at a 3rd party facility in any city or province

Pricing, Registration &

Scheduling: Please contact our training coordinator at 1-877-438-2231 x227 or via email at training@solidcad.ca

Course Description:

The Autodesk® InfraWorks Fundamentals training program is designed for civil engineers, planners and architects using the Autodesk InfraWorks and Autodesk AEC Collection.

This program provides a fundamental knowledge of how InfraWorks can be leveraged in an accelerated design process to rapidly produce data-rich 3D models with high-end visualizations. Through this process, users can create, evaluate, and quickly communicate 3D site plan proposals for faster approvals.

Learning Objectives:

- Navigate the Autodesk InfraWorks user interface
- Using Model Builder
- Create new models from scratch
- Incorporate existing data sources into the model
- Using GIS data
- Rapidly generate early design concepts for new roads and bridges
- Add essential design features like buildings, trees, cars and other urban elements to the model
- Display features according to data behind the model
- Create new styles according to project requirements
- Using styles to display features and objects
- Analyze the model using various methods to ensure project constraints are met
- Collaborate with other project team members
- Create high-impact visualization of the project to communicate the design to stakeholders
- Generate videos using storyboards
