AutoCAD Advanced

Course Details:

Duration: 3 Days

Prerequisite: AutoCAD Fundamentals

Courseware: Included

Achievement: Certificate

Time: 8:30 a.m. – 4:30 p.m.

General Information:

Locations: All courses are offered online, on-site, or in-person at SolidCAD training facilities across Canada, including:

Burnaby, BC
Calgary, AB
Edmonton, AB
Regina, SK
Winnipeg, MB
Richmond Hill, ON
Ottawa, ON
Montreal, QC
Quebec City, QC
Hanwell, NB
Halifax, NS

Pricing, Registration & Scheduling: Please contact our training coordinator at 1-877-438-2231 x227 or via email at training@solidcad.ca

Course Description:

AutoCAD Advanced builds on the AutoCAD Introduction program, helping to strengthen a user's skills by concentrating on features that go beyond the basics of creating and modifying geometry. This course covers advanced features and commands as well as CAD management topics and customization techniques.

Upon completion, users will have the confidence to create high-quality drawings, understand the proper methods to control their drawing standards and achieve efficiency through customization

Learning Objectives:

- Advanced text objects
- Working with tables
- Dynamic blocks
- Attributes
- Output and publishing
- Other tools for collaboration
- Cloud collaboration and 2D automation
- Creating, publishing, and customizing sheet sets
- Managing layers
- CAD standards and system setup
- Customizing the workspace and user interface
- Macros and custom routines

Supplemental Learning:

- AutoCAD Update
