B.C. EMPLOYER TRAINING GRANT (ETG)

SOLIDCAD CAN SUPPORT YOU

We encourage businesses to take advantage of the Job Grant available, providing direct financial support to employers who wish to purchase training for their employees.

SolidCAD supports various government programs to boost productivity through technology adoption. Our training facilities are accredited by the Labor Market Commission and all of our courses meet the requirements of the Act.

The Canada Job Grant helps employers train new or existing employees for jobs that need to be filled. This flexible program is designed to meet the needs of businesses of all sizes, in all industries and regions. Having the right skills helps employees excel and succeed in today's fast-paced labour market.

- Covers up to 80% up to \$10,000 per student.
- The maximum an employer can receive per fiscal year (April 1st to March 31st) is \$300,000 in total government funding.
- The B.C. Employer Training Grant (ETG) provides up to \$8 million in funding for employers to support skills training for their current and new employees each year.
- The goal of the ETG is to help unemployed and employed British Columbians access the skills training they need to adapt to the changing requirements of jobs and the labour market.
- The Technical Skills Training Stream of the ETG supports employers to train current or new employees to develop new skills required to operate equipment or use software. This includes computer programming, or training needed for the successful adoption of new technological systems and construction methods.

“

I have used SolidCAD for the last four years, since purchasing several new software products that required training and upgrading of staff skills and knowledge. I have found the trainers to be professional, knowledgeable and very personable/approachable.

They made the training sessions both informative and interesting while at the same time being efficient, well developed and progressive in a way that was well calculated. The training has resulted in a direct increase in productivity, which in turn increases staff morale and management satisfaction.

I would definitely recommend SolidCAD to other companies/businesses looking for a training provider to aid in their successful bottom line.

”
