CANADA-MANITOBA JOB GRANT (CMJG)

SOLIDCAD CAN SUPPORT YOU

We encourage businesses to take advantage of the Job Grant available, providing direct financial support to employers who wish to purchase training for their employees.

SolidCAD supports various government programs to boost productivity through technology adoption. Our training facilities are accredited by the Labor Market Commission and all of our courses meet the requirements of the Act.

The Canada Job Grant helps employers train new or existing employees for jobs that need to be filled. This flexible program is designed to meet the needs of businesses of all sizes, in all industries and regions. Having the right skills helps employees excel and succeed in today's fast-paced labour market.

- The Canada-Manitoba Job Grant is an employer-driven approach to help Manitobans gain the skills they need to fill available jobs and help employers develop the skills of their existing workers to meet the requirements of their present job, or to move into a better job.
- The Job Grant will contribute up to 75% of eligible training costs for small employers – those with 100 or fewer employees – and up to 50% for companies with 101 or more employees.
- Eligible employers may apply for up to \$10,000 for each individual worker to assist with training costs.
- Employers that receive funding under the Canada-Manitoba Job Grant must contribute a minimum of one-third of the eligible training costs. With the maximum government contribution of \$10,000, this means that up to \$15,000 is available, per person, for eligible training costs and up to \$100,000 per company.

“

I have used SolidCAD for the last four years, since purchasing several new software products that required training and upgrading of staff skills and knowledge. I have found the trainers to be professional, knowledgeable and very personable/approachable.

They made the training sessions both informative and interesting while at the same time being efficient, well developed and progressive in a way that was well calculated. The training has resulted in a direct increase in productivity, which in turn increases staff morale and management satisfaction.

I would definitely recommend SolidCAD to other companies/businesses looking for a training provider to aid in their successful bottom line.

”
