“

I have used SolidCAD for the last four years, since purchasing several new software products that required training and upgrading of staff skills and knowledge. I have found the trainers to be professional, knowledgeable and very personable/approachable.

They made the training sessions both informative and interesting while at the same time being efficient, well developed and progressive in a way that was well calculated. The training has resulted in a direct increase in productivity, which in turn increases staff morale and management satisfaction.

I would definitely recommend SolidCAD to other companies/businesses looking for a training provider to aid in their successful bottom line.
