Course Description:

This course is considered essential for FME users intending to author workspaces for use on FME Server. Through hands on exercises, learn the advanced skills, knowledge, and terminology needed to produce workspaces optimized for FME Server. The training will introduce basic concepts and terminology, helping you become an efficient FME Server user, enabling you to apply the product to your own needs.

During training, participants are instructed by an experienced trainer, who uses practical exercises to impart knowledge interactively and who can respond to individual questions at any time.

Audience / Prerequisites

This course is designed for proficient users of FME, intending to create FME Server-based solutions. Publishing a FME Desktop workspace is a key part of FME Server training for workspace authors. This course assumes a good familiarity with the concepts and practices of FME; at least those covered by the FME Desktop Advanced Training Course.

Learners should be familiar with:

- Parameters and published parameters
- Managing Readers, Writers, and feature types in a workspace
- Using transformers similar in complexity to the Clipper and Joiner

Learning Objectives:

- Produce workspaces optimized for FME Server.
- Author a variety of FME Server Services
- Automate workspaces using FME Server
- Create notifications
- Group components using FME Server Projects

Supplemental Learning:

- FME Server Admin
- FME Server REST API
