Course Description:

Bluebeam is designed to streamline collaboration and workflow efficiency for design and construction professionals. In our Bluebeam Fundamentals training program, our certified instructors focus on the most common navigation, mark-up, review, and publishing tasks that are common to clients in the Architecture, Construction and Engineering disciplines. This fundamental course is ideal for new users who wish to get up and running quickly.

Learning Objectives:

- Creating Overview of Interface
- Navigation; Zoom and Pan, View PDF side by side
- Markup; clouds, callouts
- Measure; measure lines, areas, volumes and more
- Capture; capture and email pdf markups
- Tool Sets; make custom tools preset with colour and styles for your specific tasks
- Markups List; useful for estimating and quantities
- Comparison; find differences between multiple PDFs
- Stamps; make and stamp one or more PDF
- Flatten; secure a PDF so others can't change your markups
- Studio Sessions and Projects; sharing screen and files with other team members
- Punch Lists; speed up the commissioning, documenting deficiencies and contract admin processes
- Bluebeam Administrator; the overall setup of Bluebeam sheet sizes and more

Supplemental Learning:

- Revit for Project Managers
- Revit Fundamentals
