

UPGRADE & EMPOWER

NAVIGATE WINDOWS 10 END-OF-LIFE WITH CONFIDENCE

IS YOUR AUTODESK ENVIRONMENT READY FOR WINDOWS 11?

With Windows 10 support ending in October 2025, and Autodesk phasing out support for its software on this platform, businesses still running Autodesk 2022 or earlier face critical risks—including:

- Security vulnerabilities
- Compatibility issues
- Software downtime

WHAT'S INCLUDED IN YOUR MIGRATION PLAN ?

SolidCAD's Upgrade & Empower Package is your all-in-one solution for a smooth, strategic migration to Windows 11 and the latest Autodesk versions—minimizing disruption, maximizing performance, and supporting every phase of your transition. From license reviews and template modernization to staff training and ongoing technical support, SolidCAD ensures your upgrade is successful, seamless, and sustainable.

✓ License Review & Hardware Audit

We analyze current license usage and run a full system audit with your IT team to verify hardware compatibility before migration

✓ Autodesk Software Deployment

Our experts deploy your software via Microsoft SCCM or your preferred method, ensuring a seamless, organization-wide rollout.

✓ Customization & Settings Modernization

We update plot styles, template paths, scripts, and more—ensuring compatibility with Windows 11 and the latest Autodesk versions.

✓ Pre-Migration Testing & Validation

We test and validate your environment in advance to deliver a bug-free, disruption-free experience.

✓ Workflow Optimization

From layer naming conventions to field-to-finish automation, we align your workflows to industry best practices.

SUPPORTING YOU BEYOND THE SWITCH

FOCUSED USER TRAINING

Equip your team with the skills they need to thrive. Our tailored training sessions empower users to fully leverage the enhanced features, productivity tools, and updated interface of the latest Autodesk software—reducing the learning curve and accelerating adoption. [Learn More >>](#)

SOLIDASSIST TECHNICAL SUPPORT

Gain peace of mind with ongoing, Canada-wide technical support from SolidCAD's bilingual, Autodesk-certified experts. Whether it's troubleshooting a software issue, resolving deployment hiccups, or answering user questions, we're here to help—in English and French, when and where you need us. [Learn More >>](#)

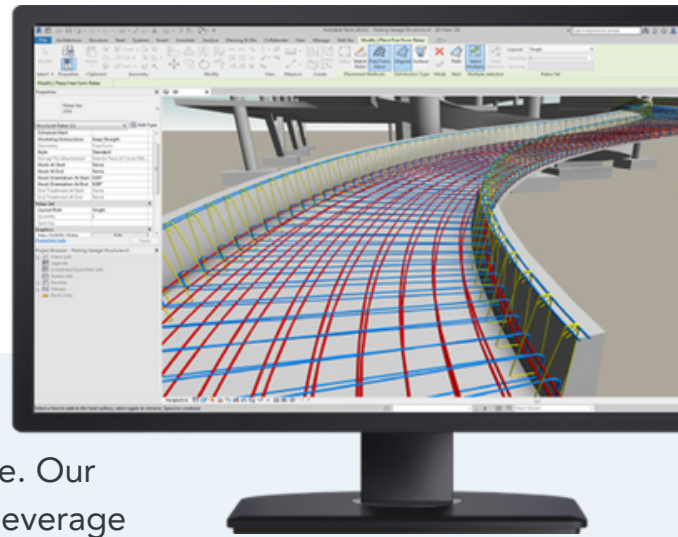

CAD ↔ GIS INTEGRATION SUPPORT

Don't let data silos hold you back. Our FME-certified integration specialists ensure your CAD and GIS systems remain connected and optimized after your upgrade—preserving automated workflows, spatial data accuracy, and interoperability between platforms. [Learn More >>](#)

DEDICATED PROJECT MANAGEMENT

Every Upgrade & Empower engagement includes a dedicated SolidCAD Project Manager who oversees planning, communication, and delivery—keeping your project on track, mitigating risk, and ensuring a seamless transition from start to finish.

Why Choose SolidCAD?

As a trusted Autodesk Platinum Partner, SolidCAD has helped hundreds of Canadian organizations across architecture, engineering, construction, and manufacturing modernize their software environments and optimize productivity. Our proven methodology, local expertise, and personalized support mean you get real results—faster and with less disruption.
